

# GREENSPEED CERTIFICATIONS

## CRADLE TO CRADLE

We are extremely proud that our range of washing and cleaning agents was the first to be awarded the Cradle To Cradle™ certificate within the professional cleaning sector. Cradle To Cradle Certified™ is a classification program based on five pillars: the use of non-toxic materials - designing with reusable or biodegradable materials - the use of renewable energy - using water responsibly - producing in a socially responsible manner.

Cradle to Cradle® is a quality model on which products are assessed based on their positive contribution to people and the environment.

## NORDIC SWAN

The microfiber cloths of Greenspeed are the first in the sector within the Benelux to have been awarded the Nordic Ecolabel. This certificate guarantees an ecologically responsible production chain from 'cradle to grave', the highest production quality and product functionality in practice. Even the packaging is designed to reduce the demands made on the environment.

Microfiber products carrying the Nordic Ecolabel offer the best quality, are sustainable, have an exceptionally long life cycle, contribute to the reduction of water and air pollution, and are not harmful to the surface that has to be cleaned.

## EU ECOLABEL

We make products which have a minimum impact on the environment during their entire lifecycle. The EU Ecolabel examines the performances of products through an independent laboratory or consumer research.

**GREENSPEED ALL-IN-ONE: SMART CLEANING SOLUTIONS WITH A POSITIVE IMPACT BASED ON MICROFIBER TECHNOLOGY AND ECOLOGICAL CLEANING & DISINFECTING SOLUTIONS.**
