

ideal cleanroom solutions

Effective in Capturing Microbes

Microfiber mops are 60% better than cotton mops at penetrating surface pores and capturing bacteria

Prevents Cross-Contamination

Microfiber mops virtually eliminate cross-contamination during janitorial tasks

Reduces Chemical and Water Use

Microfiber mopping systems use less water and chemicals, reduces the amount of water and chemicals handled and eliminates the need to wring heavy cotton mops resulting in less potential for worker injury

MOP2GO & WIPE2GO

The unique three-layer design of the **MOP2GO & WIPE2GO**: a layer that acts as a high-performance barrier against dirt and bacteria and distributes moisture evenly, an absorption layer and finally a powerful cleaning layer.

MOP2GO - disposable microfiber mop

- For daily cleaning of hospitals and offices.
- Suitable for cleaning and disinfection or as absorption material.
- Triple layered: Barrier film, absorption layer & cleaning layer.
- Large absorption capacity (10 times its own weight).
- Suitable for Click'M & Velcro frames.

WIPE2GO - disposable microfiber cloth

- For daily cleaning of all water-resistant surfaces in hospitals.
- Can be used for cleaning and disinfection or as absorption material.
- Triple layered: Barrier film, absorption layer & cleaning layer.
- Large absorption capacity (10 times its own weight)

USAGE

1. For damp cleaning of hard floors or all environmental surfaces:
2. Impregnate the mop or cloth with 4oz of [AQUAOX](#) Disinfectant.
3. Wait 30 seconds before use. Unfold the mop, place the mop on the floor with printed side on top, place the frame onto the mop & start mopping. Unfold cloth & start wiping.
4. Remove the mop from the frame after cleaning & throw away. After cleaning throw cloth away.
